How to Use the Report

Info-Tech's Category Reports provide a comprehensive evaluation of popular products in the Human Capital Management market. This buyer's guide is designed to help prospective purchasers make better decisions by leveraging the experiences of real users.

The data in this report is collected from real end users, meticulously verified for veracity, exhaustively analyzed, and visualized in easy to understand charts and graphs. Each product is compared and contrasted with all other vendors in their category to create a holistic, unbiased view of the product landscape.

Use this report to determine which product is right for your organization. For highly detailed reports on individual products, see Info-Tech's Product Scorecard.

Software Directory

HUMAN CAPITAL MANAGEMENT SOFTWARE

Selecting software can be overwhelming and one of the biggest challenges facing organizations is understanding the marketplace and identifying all of the available vendors and products. The Software Directory is a comprehensive list of all relevant software vendors in a particular category. Use this page to create the right vendor shortlist by exploring all of the options available to your organization.

SOFTWARE REVIEWS Data Quadrant

INFO~TECH Software**Reviews**

Assess vendor and product performance at a glance and use the Software Reviews Data Quadrant to identify which products and vendors are leadings the pack and which are trailing.

HUMAN CAPITAL MANAGEMENT

The Software Reviews Data Quadrant evaluates and ranks products based on feedback from IT and business professionals. The placement of a software in the Data Quadrant indicates its relative ranking as well as its categorization.

The Complete Software Experience

When distilled down, the software experience is shaped by both the experience with the software and the relationship with the vendor. Evaluating enterprise software along these two dimensions provides a comprehensive understanding of the product and helps identify vendors that can deliver on both.

Product Features and Satisfaction

The satisfaction is captured in the overall satisfaction score, which is driven by the likelihood of users to recommend the software, combined with user satisfaction across top product features.

Vendor Experience and Capabilities

The vendor relationship is calculated in a weighted average of the satisfaction scores tied to vendor capabilities (e.g. software implementation, training, customer support, product roadmap) as well as emotional response ratings toward the vendor (e.g. trustworthy, respectful, fair).

Note: The axes ranges are dynamically adjusted based on minimum and maximum values in the dataset.

Category Overview

This page provides a high level summary of product performance within the Human Capital Management category. Products are ranked by a composite satisfaction score (Composite Score) that averages four different areas of evaluation: Net Emotional Footprint, Vendor Capabilities, Product Features, and Likeliness to Recommend. The Net Emotional Footprint Score measures user emotional response ratings of the vendor (e.g. trustworthy, respectful, fair).

Use this data to get a sense of the field, and to see how the products you're considering stack up.

Emotional Footprint Summary

Emotional Footprint

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

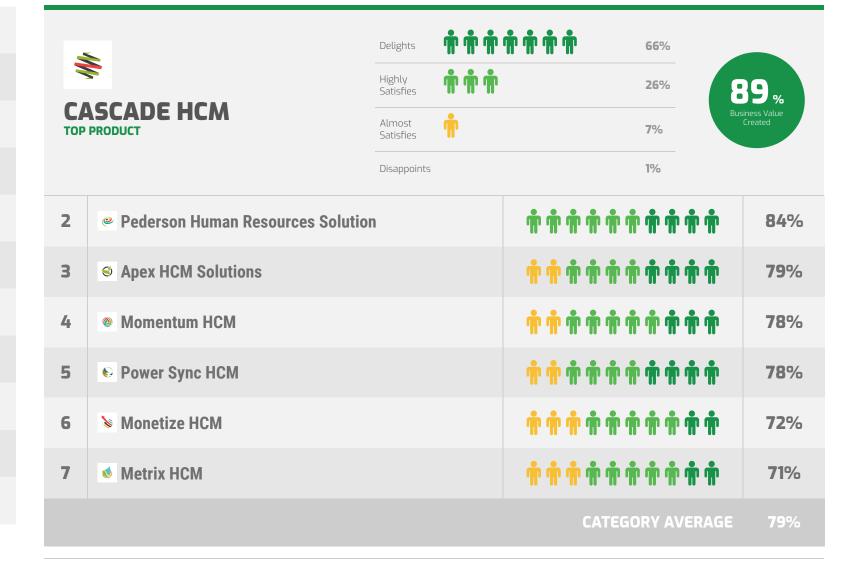

Vendor Capabilities

This table lists and briefly describes all vendor capabilities that are evaluated in the Human Capital Management software category. For your convenience, you will also find longer descriptions of the capabilities under the capability subheadings in the subsequent pages.

Business Value Created The ability to bring value to the organization. **Breadth of Features** The ability to perform a wide variety of tasks. **Quality of Features** The ability to perform at or above industry standards. **Product Strategy and Rate of Improvement** The ability to adapt to market change. **Usability and Intuitiveness** The ability to reduce training due to intuitive design. **Vendor Support** The ability to receive timely and sufficient support. **Ease of Data Integration** The ability to seamlessly integrate data. **Ease of IT Administration** Ease of use of the backend user interface. **Ease of Customization** The ability to scale the solution to a business' unique needs. **Availability and Quality of Training** Quality training allows employees to take full advantage of the software. **Ease of Implementation** The ability to implement the solution without unnecessary disruption.

Business Value Created

The underlying purpose of software is to create value for employees, customers, partners and ultimately shareholders. As a result, it is imperative that any software selection be aligned with the organization's needs and deliver enough business value to justify the cost. The data below highlights the satisfaction level associated with the business value derived from various product offerings. Use this information to identify the software that consistently creates business value for its customers.

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

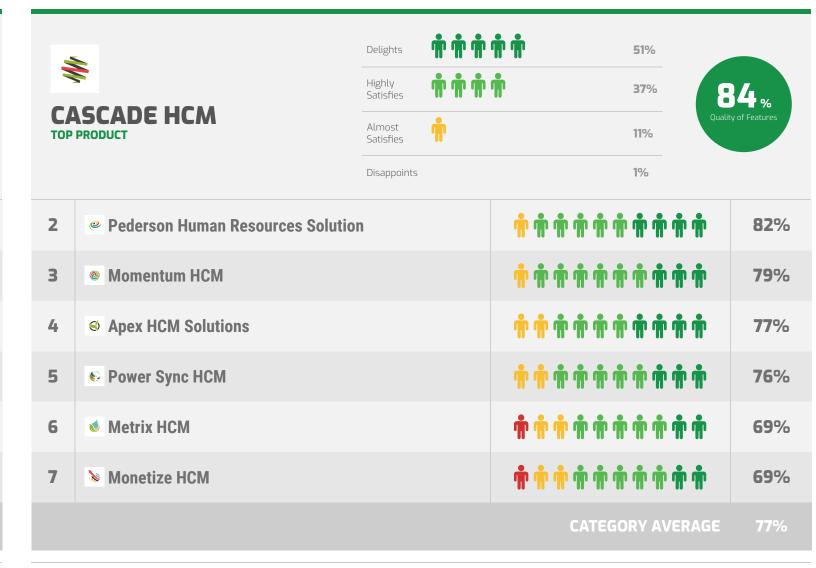

Breadth of Features

Users prefer to work with feature rich software that enables them to perform diverse series of tasks as opposed to one they find restrictive. The data below highlights the satisfaction level associated with the breadth of features from various product offerings. Use this information to identify which software offers valuable comprehensive functionality that extends beyond the basic level.

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Product Strategy and Rate of Improvement

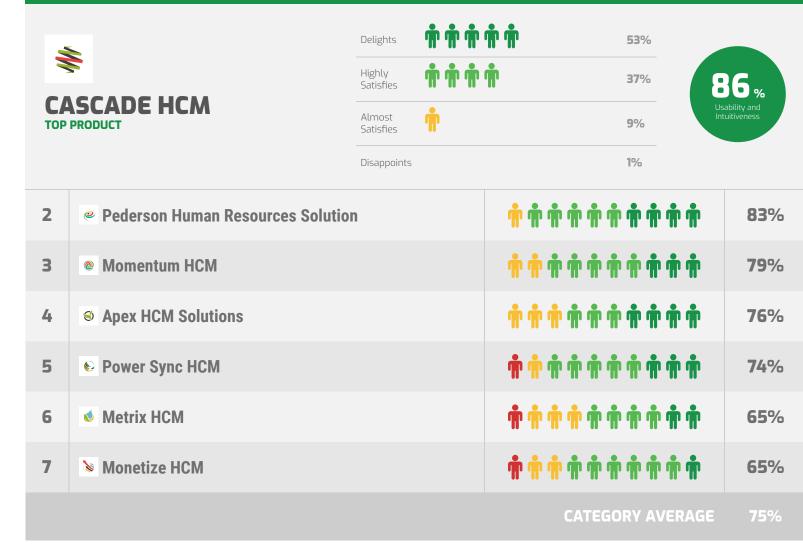

Purchasing software can be a significant commitment, so it's important to know if your vendor is serious about the need for constant improvement and deliberate strategic direction. Vendors who don't stay on top of emerging needs and trends won't enable you to meet your business goals. Use the data in this section to separate innovators from imposters.
